RICO Paladar FROZEN FOODS

BRAZILIAN CHEESE BREAD

Rico Paladar is a family-owned company that has been in the frozen food market for 4 years.

It all started when Cleber left a frozen food company, where his brother Renato also worked as a production manager, and, due to this, they decided, in a family meeting, to start their own business, specializing in the production of Brazilian Cheese Bread. At the beginning, they rented a 30 m² space, purchased equipment and a vehicle for deliveries. With an initial small production, they sold the products door to door to local shops and businesses in the region.

Today, the company is located in Curitiba, in the Uberaba district. It has its own facilities, with infrastructure and skilled employees, who work with top-quality raw materials to serve the best Brazilian Cheese Bread in the city.

Rico Paladar's mission is to offer a differentiated product, focused on quality and excellence, to meet the market's needs, both in wholesale and retail.
